

Dr. Bruce Levy is the Parker B. Francis Professor of Medicine at Harvard Medical School, Interim Chair of the Department of Medicine and Chief of the Pulmonary and Critical Care Medicine Division at Brigham and Women's Hospital.

He received his medical degree from the University of Pennsylvania School of Medicine (now the Perelman School of Medicine). He then completed residency in internal medicine, a chief medical residency, and a fellowship in pulmonary and critical care medicine at BWH. He is board certified in internal medicine, critical care medicine and pulmonary disease. Dr. Levy cares for hospitalized patients in the BWH medical intensive care unit and outpatients in the BWH Lung Center where he has helped to establish the Severe Asthma Clinical Center and the COVID Recovery Center.

Dr. Levy's Airway Inflammation and Resolution "AIR" laboratory aims to identify new pathways to resolve pulmonary inflammation, infection, or injury by understanding the roles of naturally-derived, specialized pro-resolving mediators in health, and then translate these findings to the pathobiology of important lung diseases, including asthma, pneumonia, ARDS and Long COVID. His work has helped lead to more than 250 peer-reviewed publications, over 10 patents awarded or pending, and a new biotech start-up company and he has had continuous funding from the National Institutes of Health since 1993. He is an active participant in NIH grant review study sections and was recently appointed to the Board of Scientific Counselors of the NHLBI. He is an elected member of the ASCI, AAP and Interurban Clinical Club. He is active in the American Thoracic Society (ATS) and has served in several leadership roles for the ATS, including as Chair of the Publication Policy Committee and a member of the Board of Directors.
